Good Afternoon,

I am tired of seeing a letter in the NOW paper from Mike C. that continues to attack our District, its' employees and our efforts to help students be successful. I would like to craft a response to the paper from the School Board. I would also like to ask our legal council about these continued attacks many of which contain information that is not true. The letters do nothing but defame the District's character and reputation. They also negatively impact the work that we are trying to accomplish. We owe it to our children and our community to respond and identify a strategy to get these kind of letters restrained.
